

*Our vision is to ensure we deliver authentic Catholic education with care and compassion.*

## Learning@StLeo's

### A Leo's Learner is:

- Collaborative
- Independent
- Responsible
- Resilient

### Learning at St Leo's is:

- Rigorous
- Informed
- Relational
- Empowered

### Hope Filled

All students are guided to develop a growth mindset that enables them to become young people who are resilient and persistent, and believe in their capacity to achieve, reflect and grow. The Catholic Values develop the capacity for every student at St Leo's to work both independently and collaboratively to contribute positively in their world and the world of others.

## Introduction

Our St Leo's Teaching and Learning Framework has been developed collaboratively in alignment with our two Strategic Opportunities: -

- Embedding High Expectations
- Ensuring Growth for All

Through this framework, St Leo's learners can strive towards becoming competent, confident, Catholic-valued young people of conscience by developing their attributes of collaboration, resilience, responsibility and independence. As a Catholic learning community, we are dedicated to the principles of teaching and learning that is rigorous, informed, relational and empowered:

### Rigorous

All students are entitled to learn a knowledge-rich curriculum. Staff at St Leo's understand the need to support each student in developing resilience in meeting the challenges of explicitly teaching content, regularly assessing student understanding and collaborating with colleagues to apply professional judgement to ensure all students demonstrate growth.

### Informed

All students engage in data and evidence-informed learning that focuses on improving learning outcomes. Assessment is designed to allow students to demonstrate independence in their learning, and feedback is designed to allow for reflection on next steps so they can grow in their learning.

### Relational

All students are taught in safe, respectful and inclusive classrooms that foster growth and improvement. St Leo's students are explicitly taught how to engage with feedback, collaborate effectively with peers and staff, and reflect on their learning journey.

### Empowered

All students are empowered to become autonomous learners with the capacity to show initiative in their learning. Explicit teaching of self-regulation and high expectations support student wellbeing, resilience and learning growth.

## Developmental Continuum

How do our students demonstrate the attributes?

The developmental continuum allows students to identify the behaviours and actions that characterise their learning profile at any given time. These attribute statements enable students to consider the continuous process of improving how they can engage in their learning. Learning progressions along the continuum help teachers plan instructional sequences with performance indicators that provide opportunities for multiple learning pathways.
